<b>Office Action Summary</b>	<b>Application No.</b> 10/799,915	<b>Applicant(s)</b> SOMMER, SEBASTIAN	
	<b>Examiner</b> Leo B. Tentoni	<b>Art Unit</b> 1791	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 10 December 2007.
- 2a) ☒ This action is **FINAL**.                      2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**DETAILED ACTION**

***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 1-20 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. In claim 1, line 7, the newly-added limitation of "destroys the plugs" (emphasis added) is not supported by the originally-filed specification and thus, constitutes new matter (the originally-filed specification supports destroying the plug binder (see page 12 of the originally-filed specification, or paragraph [0030] of the publication)).

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the

Art Unit: 1791

art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

4. Claims 1-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over the admitted prior art on page 1, line 20 to page 3, line 20 of the originally-filed specification in combination with Hoyt (U.S. Patent 5,728,226 A) for the reasons of record.

***Response to Arguments***

5. Applicant's arguments filed on 10 December 2007 have been fully considered but they are not persuasive.

6. Applicant argues (page 7) that there is nothing in the admitted prior art to suggest that the plugs contain (as recited in instant claim 1) an oxidizable substance which, upon oxidative decomposition, destroys the plugs. Examiner responds that the admitted prior art teaches the use of clay (as a graphite/clay mixture) which is an oxidizable substance. Furthermore, the plugs are not destroyed but rather, the plug binder that is destroyed (see page 12 of the originally-filed specification or paragraph [0030] of the publication).

7. Applicant argues (page 7) that Hoyt does not mention any form of oxidation and that the words "oxidize" and "oxidation" are not present in Hoyt. Examiner responds that Hoyt teaches two "burn offs" which meet the limitation of "oxidize" or "oxidation". Furthermore, even if Hoyt prefers the use of a supercritical fluid, the teaching of Hoyt regarding burn offs is still a valid prior art teaching.

**Conclusion**

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
